

Davis Vision invested significant capital and development hours so we can better serve you by improving our inventory management system. We want our providers to be confident knowing that all Davis Vision Exclusive Collections will be receiving the annual attention it requires through our Refreshes and/or Physical Inventory events.

Over the past year a dedicated team has been working diligently to develop an effective and efficient inventory management and distribution system for our Exclusive Collection - we are happy to announce that this system will go live May 2013.

What is the Inventory System and How Does It Help Me?

System Benefits

The Davis Vision Exclusive Collection inventory management and distribution system provides us with numerous benefits and features associated with provider inventory. Our Inventory system will provide improved data integrity which will be the foundation for additional strategic initiatives in the future.

Data Integrity

The advanced inventory system will organize the volume of inventory being refreshed and returned throughout the year. This will help Davis Vision ensure that you have the most complete and updated collection of 222 frames.

- The implemented system will provide an accurate electronic scanned perpetual inventory through either annual refreshes or physical inventory counts completed by a third party supply chain inventory service.
- Inventory count sheets will be left on site for the physical inventory or display frame refresh events to ensure product accuracy that will be offered to your patients.

Product Dependability

All Davis Vision members should experience the complete 222 frame collection when visiting a provider's office. A benefit to our membership and providers is the added feature of replacing any missing product on the Exclusive Collection.

- Should you need to return any of your 222 frames simply visit www.davisvision.com/Providers and click Provider Inventory Return Policy.*
**please note your return is not processed until you receive a return authorization number (RAN).*
- To replace a damaged or missing display frame simply visit www.davisvision.com/Providers and click Exclusive Collection Frame Replacement.
