

Eye Health Connection Program

Dear Member,

Davis Vision is pleased to welcome you to the Eye Health ConnectionSM program! Your employer has purchased the Eye Health Connection Program as part of your vision benefits package. Our records indicate that you may have or could be at risk for developing Glaucoma.

Recently, you have self-registered for more information regarding this condition on the Davis Vision website- Eye Health Connection page. Over the next two years, you'll receive communications approximately three times per year informing you about this condition, providing further explanation about your Davis Vision benefits and providing you with additional information to maintain healthy vision.

Keep an eye out for our next piece: "Diagnosis Overview," which will provide an explanation of the specific eye disease that you are interested in managing, associated risk factors, and the recommended frequency for a comprehensive eye exam to help protect and maintain your eye health and vision. Subsequent pieces will feature questions you can ask your eye care provider, and health and wellness information related to these eye conditions.

You may also visit our Vision Wellness library online at www.davisvision.com for additional information about maintaining healthy eyesight.

Your eyesight is precious. Preserve it!
