

Progressive Addition (PAL) and Intermediate Lens Formulary - Effective 1/1/2015

In order to best support each practitioner's professional judgment in providing the ideal PAL design for an individual patient's needs, Davis Vision has implemented a tiered progressive lens formulary. Under this formulary, members may receive any of the lens styles within the tiers/categories for which they are eligible. The patient charges for each of these tiers may differ and is indicated on the group specific Service Record Form or the Personalized Service Record Form. The listing of all progressive lens designs within each tier is represented below:

Standard Progressives		Select Progressives ^{1/}		Premium Progressives		Ultra Progressives ^{1/}		Intermediate Lens Styles (Task specific lens designs)

^{1/} Please refer to the Service Record Form to confirm if this tier is available.

Please Note: If your patient cannot successfully adapt to a progressive lens design within the first ninety (90) days, replacement SV, bifocal or trifocal lenses will be provided - without cost - to the member. However, any prior progressive co-payments/option charges will not be refunded to the patient. This formulary is subject to change. Please visit the Davis Vision Web site at www.davisvision.com for the current formulary.
