

What are Digital Freeform Progressives?

- Digital Freeform Progressive lenses are the most technologically advanced lenses in the industry, providing the wearer with improved clarity and visual comfort by optimizing the wearer’s prescription to produce a smoother transition from one zone of viewing to another.
- These lenses are fabricated utilizing computer-controlled surfacing equipment that is much more precise than conventional tools.
- The lens designs are digitally produced utilizing a diamond point lathe on the back surface of the lens to create a custom progressive design.

Davis Vision Ultra Progressive Lens Options

	MyFocal™ HD (Proprietary Design) 14, 16, 18	Shamir InTouch™ 15, 18
